# Cor-A-Rosta® 316L

# **TOP FEATURES**

- Improved quality of welds, higher current density coming from the nature of cored wires eliminates typical disadvantages of GMAW and SMAW welding
- Reduced welding cost compared to GMAW
- Very good weld appearance and regularity, optimal slag system helps to achieve best results.

# **TYPICAL APPLICATIONS**

- Steel construction
- Chemical industry
- Shipbuilding
- Food and brewery

# CLASSIFICATION

| AWS A5.22      | E316LT0-1/-4        |  |  |  |  |
|----------------|---------------------|--|--|--|--|
| EN ISO 17633-A | T 19 12 3 L R C/M 3 |  |  |  |  |

# **CURRENT TYPE**

DC+

## **WELDING POSITIONS**

Flat/Horizontal

# SHIELDING GASES (ACC. EN ISO 14175)

| M21      | Mixed gas Ar+ (>15-25%) CO <sub>2</sub> |
|----------|---|
| C1       | Active gas 100% CO₂                     |
| Gas flow | 15-25l/min                              |

| Typical values      | M21/C1        | AW         | 440            | 580              | 38         | 70               | 40     |

\* AW = As welded

## PACKAGING AND AVAILABLE SIZES

| Wire diameter<br>(mm) | Packaging    | Weight<br>(kg) | ltem number |  |
|-----------------------|--------------|----------------|-------------|--|
| 1.2                   | SPOOL (S300) | 15.0           | 585308      |  |

#### TEST RESULTS

Test results for mechanical properties, deposit or electrode composition and diffusible hydrogen levels were obtained from a weld produced and tested according to prescribed standards, and should not be assumed to be the expected results in a particular application or weldment. Actual results will vary depending on many factors, including, but not limited to, weld procedure, plate chemistry and temperature, weldment design and fabrication methods. Users are cautioned to confirm by qualification testing, or other appropriate means, the suitability of any welding consumable and procedure before use in the intended application

Safety Data Sheets (SDS) are available here:
