

Portable, automatic straight-line cutting machines, available in models to suit 115v and 230v input power supply.

Simple design with a easy-to-use interface, these machines cut straight lines, circles (20cm-2m radius) and bevels on 5mm-50mm thick steel.

Constant adjustable travel speed - in forward or reverse - to provide good machine-quality cuts.

Robust and compact manufacture with brass and stainless steel machined components.

Supplied with a 1.8m length of distortion-proof steel track (extra lengths available per metre – pt no. BCG30ITRK) and a selection of cutting nozzles.

Features

Power Frequency : 50HZ

Power Voltage : 220V (+/-10%) or 110V as stated on the machines front panel

Cutting speed : 150-800mm/min

Motor rotation speed : 1500r.p.m

Cutting accurately in a straight line, Circle or up to 45 degree angles

Thickness of cutting : 5~50mm

Machine Weight : 7.0 KG Machine Weight with one Torch Fitted : 9.5 KG

Machine Dimensions : 350 x 140 x 175mm

Length of the guide rail : 1.8 metres

Track Width : 160mm
