

Flex-Loc™

The Flex-Loc™ series torch is a variable angle torch that locks into any position within a 360 degree rotation. Interchangeable heads allow different size tungsten and head sizes to be quickly and efficiently changed. The patented Flex-Loc™ TIG Torch is available in water cooled and gas cooled models. **Great for applications requiring a unique angle yet allowing the user a rigid torch.** Ergonomically designed to help eliminate fatigue.

Applications: Cup walking on pipe root welds, welds that require a mirror to access weldment, welds requiring different tungsten sizes.
