WELDING PROCESS

Shielded Metal Arc welding SMAW (STICK)

FEATURES

- Arc welding source in D.C. welding
- High frequency control of welding current and voltage
- Engine shut down for low oil level (oil alert)
- **Power optimiser** (patent pending)
- Auto Idle
- Portable

DEFINITIONS

SMAW: Coated electrode welding is an arc welding with protected metal.

GMAW: welding is an arc process with metal under gas protection.

FCAW (FLUX CORED): The process with cored wires is very similar to MIG / MAG welding. Continuous wire is not full but consists in a metal strip that wraps a powders core (flow).

GTAW: is a welding process that uses a tungsten electrode that cannot melt.
